

STEPOVER BENCHES

WITH COMPARTMENTS

Stepover benches manufactured from grade 304 stainless steel (also available in 316) with an electro-polished surface, continuously welded seams and non shedding adjustable levelling feet. Stepover benches create a physical barrier between the clean and dirty side of a changing area,

helping to ensure good gowning practice whilst also providing useful storage space in often cramped spaces. Stainless is a preferential material due to its cleanability, strength and durability properties. It is also a material that will not generate particulate and offers high levels of resistance to acids and cleaning agents.

STAINLESS STEEL

 Standard configurations are presented on the following pages, however stepovers can be manufactured in custom sizes and configurations to suit any space and layout. Popular bespoke options include L-shape configurations and units with integrated lockers or pigeon hole storage space.

Stepover with compartments:

- Grade 304 stainless steel frame, legs & surface
- Fully welded seams
- Adjustable levelling feet
- Storage compartments under bench
- Also available in grade 316 stainless

TRESPA STEPOVER RENCHES

Trespa is a high-pressure compact laminate consisting of layers of woodbased fibres (paper and/or wood) impregnated with thermosetting phenolic resins and surface layers are impregnated with melamine based resins. These components are bonded together with simultaneous application of heat and high specific pressure to create a homogeneous non-porous material with increased density and high chemical resistance whilst providing attractive aesthetics. The bench framework is created from powder-coated steel box section to give the benches strength and stability.

Stepover with compartments:

- High pressure laminate (Trespa) surfaces
- Powder-coated steel box section framework
- Clean and durable material
- Storage compartments under bench
- Available with lockable cabinet doors
- Available with coat rail and hooks or hangers

SHELVING STAINLESS RACKING

Guardtech stainless racking is manufactured from grade 304 stainless steel 30x30mm box section, continuously seam welded to eliminate ledges that are typically found with standard modular shelving units.

- Standard shelves are slatted to allow for airflow to pass through and to minimise ledges for particulate settlement, but can also be provided solid or perforated.
- Grade 304 stainless steel 30mm box section
- Fully welded construction
- Available as mobile unit with swivel castors
- Available with solid or perforated stainless sheet shelves
- Available as two, three and five-shelf units

SINKS

Guardtech sinks are manufactured from grade 304 stainless steel and are designed for washrooms and change areas in critically controlled environments. Sinks are available with a standard lever tap system, knee operated or with infrared motion detection taps for hands-free operation to reduce cross contamination from contact.

• The following pages illustrate some standard options - however, sink and tap configurations can be manufactured to meet the exact space and specification requirements of your business.

FEATURES

- Easy to clean slopping top
- Optional under-sink shelving & cupboards
- Available with point-of-use heaters
- Drainage pumps can be incorporated
- Open pedestal or stainless shroud options
- Available in 316 stainless steel

- Grade 304 stainless steel
- One tap and bowl per operator configuration
- Motion detector taps as standard
- Sloping top and high splashback
- Dyson Airblade taps (pictured) available
- Available in grade 316 stainless steel

MVMT PRO

The MVMT Pro is designed for today's ultra-critical environments including staticsensitive and particle/microbe-controlled areas. The MVMT Pro offers weight-activated control, meaning an individual user's weight sets the tension, which alleviates resetting controls in multi-user shift workplaces.

• The seating is engineered for a task-specific range of motion and constant use. The MVMT Pro has a high end modern aesthetic and positively enhances corporate image.

- Waterfall-front seat 18.5" wide x 17" deep x 3" thick with four-way contouring
- Backrest 15.5" wide with full lumbar support
- Soft-touch pneumatic seat-height adjustment, rearward seat tilt, backrest tilt and height adjustment
- Optional static control seating with ESD upholstery rated to Class 1/ISO Class 3
- Dual-wheel non-marring polyurethane casters resist movement when the chair is unoccupied
- Lock-out control mechanism can be locked in three different reclining positions with a simple twist of a knob
- Suitable for ISO3 to ISO5 controlled environments.
- OR code profile system delivers individual webpage for every specific MVMT unit manufactured
- Hermetically sealed under-seat rubber boot encapsulates moving parts and meets the stringent requirement of ISO3
- Supported by a generous 13-year warranty

Armrest adjustment - height, width and depth can be adjusted & locked

Height adjustable stainless steel footring - 22" diameter slides easily, holds positively and stays put

MVMT TECH

Like the MVMT Pro, the Tech Series was created for ultra-critical environments including static-sensitive and particle/microbe-controlled areas such as medical device manufacturing, genetic research, pharmaceutical processing and similar facilities.

- Tech Series comes without arms as standard to allow tucking under work surfaces. Models available with tall and medium backrests and 13-year warranty.
- Similar to the MVMT Pro but with slightly downgraded control mechanisms, a cost effective yet high quality cleanroom seating option
- Intuitive functionality including weight-activated control and synchronous seat and backrest
- Engineered for task-specific range of motion
- Exclusive QR code product tag delivers individual webpage for every MVMT unit manufactured
- Easy wipe-down upholstery

ARMOUR

Rugged multipurpose construction, full ergonomic adjustability and antimicrobial properties make this Armour series chair a versatile seating solution for lower grade controlled environments, laboratories and educational applications.

● This chair is designed for use at 29-33" high desks and benches. Functions include pneumatic seat height adjustment range of 17-21", fixed rearward seat tilt of 3.5 degrees, plus backrest tilt and height adjustment controls. Features 16" wide by 10.75" high backrest with lumbar support, ergonomic 17.5" wide by 15.5" deep seat with waterfall front, robust 23" diameter tubular steel base with affixed 21" diameter footring and dual-wheel, non-marring polyurethane casters that resist movement when the chair is unoccupied.

Easy-to-clean seat and backrest feature stipple finish and contain UV inhibitor and antimicrobial properties. Metal parts have chrome finish.

- Ergonomic seat with waterfall front
- Dual-wheel non-marring polyurethane casters resist movement when the chair is unoccupied, enhancing workplace safety by inhibiting seating from rolling away
- Rugged multi purpose seating with antimicrobial properties and UV inhibitor standard in every seat and backrest
- 13-year warranty with lifetime warranty on pneumatics
- Optional 22" diameter adjustable footring
- Also available in high bench configuration (seat height 24-33")

Task control with soft touch pneumatic adjusts seat height and backrest angle and height

Seat and backrest made from Polypropylene containing UV inhibitor and antimicrobial properties

cleanroom hardware

HEPA Filter

STRATOS

The Stratos cleanroom chair offers a designed ergonomic solution for healthcare and laboratory applications at a highly competitive price point.

This model features a HEPA filter on the underside of the seat which acts to restrict the expulsion of particles as well as the absorption of potential bacteria into the chair.

Upholstered sculpted seat and back

• Unique back support bar provides back and seat angle adjustment as well as ratchet back height adjusment

Options

- ight adjustable arms

All Stratos LAB chairs comply with ISO 14644-8 2022

Dimensions

Sturdy base design offers reliable and comfortable user support

OPUS

The Opus model is a polyurethane cleanroom seating solution designed to provide a robust and highly cleanable option for many applications.

- Unique back support bar provides back angle, height and lumbar adjusment
- Sculpted air channels to ensure maximum comfort and support
- Arm chair versions available in the Opus cleanroom chair range

OPU-3-LAB Adjustable arm

OPU-3-LAB Fixed arm

Options

- ndependent seat and back tilt adjustment
- ixed arms
- eight adjustable arms
- afety castors
- rake-loaded castors
- Black nylon base
- Aluminium centre footring

WORK BENCHES

STAINLESS STEEL

Workbenches manufactured from grade 304 stainless steel (also available in 316) with an electro-polished surface, continuously welded seams and non-shedding adjustable levelling feet. Stainless steel is a preferential material due to its cleanability, strength and durability properties. It is also a material that will not generate particulate and offers high levels of resistance to many acids and cleaning agents.

Single bar frame:

- 304 grade stainless steel frame (30x30mm box) and work surface with fully welded frame & joint
- Heavy duty frame is manufactured from 50x50mm box section and has the rail at the rear of the unit
- Available on casters as a mobile bench
- Available in 316 stainless steel
- All sizes can be configured with one or two solid shelves.

HEIGHT ADJUSTABLE WORK BENCH

TRESPA WORK

Trespa is a highpressure compact laminate consisting of layers of wood-based fibres (paper and/or wood) impregnated with thermosetting phenolic resins and surface layers with with melamine-based resins. The components are bonded together with simultaneous application of heat and high-specific pressure to create a homogeneous non-porous clean,

smooth and attractive material with increased density and chemical resistance. Our Trespa bench frameworks are

fashioned from powder-coated steel box section to give work benches strength and stability.

- Adjustable levelling feet or casters

TRANSFER HATCHES

STAINLESS STEEL

Transfer Hatches provide a controlled air-tight zone between classified and non-classified or lower-graded environments for the transfer of products and ancillary items. Transfer hatches eliminate

unnecessary traffic from the cleanroom and reduce particle ingress, while reducing the risk of cross-contamination. Chambers are adequately sized to allow for product wipe down with preferred cleaning agents.

• Stainless steel hatches are typically used in Pharmaceutical applications, providing high chemical resistance and hygienic surfaces for easy cleaning. Stainless construction is highly durable and ensures longevity of a piece of equipment that will be used many times throughout the course of a day.

BIOSAFETY CABINETS

CLASS III ESCO.

Esco offers a range of Class III cabinets that provide the highest level of personnel, product and environment protection against agents assigned to biosafety levels one two, three and four.

 Class III cabinets can be custom-built to suit different process and budget requirements of the client. Multiple Class III cabinets can be joined together in a 'line' to provide a larger working space. Several pieces of

They are frequently used for handling the deadliest biohazards such as bacteria, viruses and microorganisms. Call 0330 113 0303 to discuss your various options with a Guardtech rep.

equipment, such as refrigerators, shelves, microscopes, centrifuges and incubators, can be installed inside the Class III cabinets upon request. Call 0330 113 0303 for more information on your cabinet options.

Airstream® Class III Biological Safety Cabinet

- Exhaust air is double-filtered through high-quality ULPA filters (per IEST-RP-CC-001.3) with typical efficiency of >99.999% for 0.1 to 0.3 micron particles, better than HEPA filters
- An angled cabinet front ensures a comfortable working posture
- Exclusive dual exhaust filters provide > 100.000 times better protection than single-stage designs
- Microprocessor-based Esco SentinelTM Silver control system provides visual/audible alarms for airflow
- Magnehelic* pressure gauge is mounted in the rear of the work zone for at-a-glance monitoring of work zone negative pressure
- Neoprene™ gauntlets are single- piece, leak-tested glove assemblies which guarantee maximum protection
- An integrated pass-through with interlocking doors permits materials transfer without risk of environmental contamination
- Esco ISOCIDETM antimicrobial surface on all painted surfaces minimizes contamination
- Cabinet operates at negative pressure relative to the laboratory in order to prevent migration of pathogenic materials out of the work area

FUME HOODS

Ascent™ Max Ductless Fume Hood Standard Model ADC (B-Series)

DUCTLESS ESCO.

Esco Ascent Ductless Fume Hoods provide protection to both laboratory personnel and the environment from toxic fumes and are quickly becoming

a viable alternative to conventional fume hoods. Call 0330 113 0303 to discuss our various options with a Guardtech rep.

• These hoods filter out chemical fumes and recycle air directly back to the laboratory, providing energy savings, personnel and environmental protection, and convenience, as you

do not have to deal with complicated ducting systems, and mobility, since ductless hoods are independent systems. Guardtech are also able to offer ducted fume cupboard options.

- Electrogalvanised steel wall for maximum durability
- Front service panel opens up easily for maintenance functions
- Grade 304 stainless steel work top surface that will never rust, chip or generate particles
- Lip at the front edge of work surface ensures that any spillage is contained in the work zone
- All cabinet service and filter replacement can be carried out from the front, allowing the cabinet to be placed against wall in the laboratory to save space
- Optional VOC sensor to monitor chemical concentration within the cabinet work zone
- Ergonomically-designed raised arm rest helps prevent grille blocking and create a comfortable working posture
- Over eight different Nanocarb™ filter types to choose from: volatile organic compounds, acid, mercury, sulphur, halogen, aldehyde, ammonia or ethers/chloroform

Also available for installation. Call 0330 113 0303 or email sales@guardtech.com for more information.

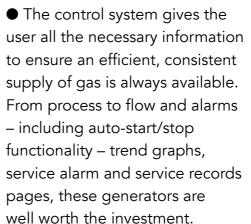

Ascent™ Opti Ductless Fume Hoods

NITROGEN GENERATORS

The Guardtech Group's Nitrogen Generators are a reliable and efficient alternative to conventional high pressure cylinder and liquid gas supplies. Taking away the ongoing costs, safety considerations and transportation of traditional gas supplies, our generators are some of the most advanced and intelligent available.

AUTOCLAVES

FREE STANDING

The Guardtech Group provide a range of autoclaves specifically designed for use within the laboratory industry to sterilise plastics, media, liquid, glassware and instruments.

Our large capacity auto-

 All Guardtech autoclaves adhere to the relevant national and international standards for ultimate peace of mind.

claves with intuitive Logiclave® control systems have been designed for ease of operation and maintenance.

Built to a high specification, they are renowned for both quality and reliability.

With a choice of chamber designs, door options and containment models, there is an autoclave to suit your business' needs.

• The LAB300V is a self contained freestanding multipurpose autoclave for a variety of laboratory applications

Other models in this range are the LAB150V and LAB225V which each share similar footprints and design characteristics

LAB300V free standing autoclave

BUILT-IN AUTOCLAVES

A typical sterile services arrangement of 4x Logiclave PL600 porous load sterilizers. Available with single door or passthrough options.

Also available for installation. Call 0330 113 0303 or email sales@guardtech.com for more information.

AIR SHOWERS

Self contained chambers installed at entrances to cleanrooms and other controlled environments. They minimise particulate matter entering or exiting the clean space. Personnel and materials entering or exiting the controlled environment are "scrubbed" by high velocity HEPA-filtered air jets with velocities of 20-22m/s (4000-4300fpm). Contaminated air is then drawn through the base within the unit, filtered and recirculated.

- High velocity shower jets in excess of 20 m/s ensure efficient scrubbing action
- Operating modes can be programmed in the field
- Microprocessor controller
- Mini-pleated HEPA filtration achieves > 99,999% typical efficiency at 0.3 micron particles

Multiple Occupancy Showers

Infinity Air Shower Pass Box

MEASURING INSTRUMENTS

The Sauermann DBM 620 Air Flow Meter is a multipurpose electronic air balancing instrument

primarily used for efficiently taking direct air volume readings from air vents.

- Air Changes per Hour (ACPH) metric is the first of its kind to be included in a Balometer
- Easily swap between five different hood configurations
- SmartKap App allows for easy reading and export of data
- Also functions as autonomous micromanometer with Pitot tube attachment
- Lighter and smaller than previous models
- Extendable tripod eliminates the need for ladders in most environments

DBM 620 Air Flow Meter

MEASURING INSTRUMENT	PRODUCT CODE
DBM 620 Air Flow Meter	GTMEASDBM620

LV 110 Thermo-anemometer

- Displays velocity and temperature measurements
- Airflow calculation
- Automatic average
- Hold function and min-max values
- Selection of units
- Airflow calculation, airflow calculation with cone (LV 110/117), detection of flow direction

MEASURING INSTRUMENT	PRODUCT CODE
LV 110 Thermo-anemometer with integrated vane probe	GTMEASLV110
HD 110 Thermo-hygrometer	GTMEASHD110
VT 210 Thermo-hygrometer-anemometer	GTMEASVT210

HD 110 handheld thermo-hygrometer

Ssauermann

- HD 110 handheld thermo-hygrometer measures relative humidity, temperature and dew point
- Measuring range: humidity: 5 to 95 % RH, temperature: -20 to +70°C, and dew point: -40 to +70°C td

29.

Calibration certificate

VT 210 Thermo -hygrometer-anemometer

- Designed for the control of ventilation systems – allows users to measure air velocity, airflow and temperature in ducts
- Up to six measurements simultaneously

TRANSMITTERS

C320 Multifunction Sensor

- Multifunction for VAC IAQ and applications
- Displays and measures four parameters simultaneously
- 4 x analogue outputs
- 2 x inputs for external probes
- 1x RS-485 interface for Modbus RTU protocol
- Graphic touch display
- Visual channel alarms plus acoustic alarm
- Wireless communication (optional) with mobile app

MEASURING INSTRUMENT	PRODUCT CODE
C320 Multifunction Sensor	GTMEASC320

× 38.7 ...

CPE320 Transmitter

- Flushmount multifunction pressure sensor
- Measures temperature, humidity, air velocity, CO, CO2
- Three visual and audible alarms
- IP 66, VHP resistant

MEASURING INSTRUMENT	PRODUCT CODE
CPE320 Transmitter	GTMEASCPE320
